

NEUTRON STARS IN SUPERNOVA REMNANTS

NASA Grant No. NAG5-11295

Final Report

For Period 15 August 2001 through 14 August 2002

September 2002

Principal Investigator
Patrick Slane

Prepared for:

National Aeronautics and Space Administration
Goddard Space Flight Center
Greenbelt, MD 20771

Smithsonian Institution
Astrophysical Observatory
Cambridge, Massachusetts 02138

The Smithsonian Astrophysical Observatory
is a member of the
Harvard-Smithsonian Center for Astrophysics

The NASA Technical Officer for this Grant is Dr. Lou Kaluzienski, NASA,
Headquarters, Code SZ, Washington, DC.

The grant provided funds for a conference entitled "Neutron Stars in Supernova Remnants" held in Boston on 14-17 August 2001, in part to support invited speakers and students attending the meeting. The conference was completed on the specified dates and was a considerable success, attracting over 100 scientists from around the world. The conference included talks and papers on the most recent work in this field, including results from the Chandra X-ray Observatory, XMM-Newton, the Parkes Multibeam Pulsar Survey, the Very Large Array, and many other facilities. Theoretical work based on the latest results was also highlighted.

The Proceedings of the conference have now been published as "Neutron Stars in Supernova Remnants" (Astronomical Society of the Pacific, Volume 271, eds. P.O. Slane and B.M. Gaensler). In addition, a large fraction of the papers from the conference have been submitted to astro-ph, and the volume is indexed through the Astronomical Data System at http://adsabs.harvard.edu/cgi-bin/nph-bib_query?bibcode=2002nssr.conf.....S&db_key=AST&high=3be165a92511483
